Hon. William K. Reilly
Administrator
Environmental Protection Agency
401 M Street, S.W.
Washington, D.C. 20460

Dear Mr. Reilly:

Recently we have become increasingly concerned about the air quality in the rural counties that surround Jefferson Co., Kentucky. It has come to my attention that it is possible to substantially improve air quality by the use of a performance additive known as Hitec 3000.

I have been informed that the use of the additive will significantly reduce NOx, and that the product is compatible with gasoline containing methanol, ethanol, and other reformulated fuels.

I urge the Environmental Protection Agency to give prompt attention to the use of Hitec 3000. We should make every effort to improve our nation's air quality.

Yours very truly,
A handwritten signature in cursive script, appearing to read "Marshall Long".
